The opening balance of the Mcty is only Rs 8299 and out of this Rs 2000 will be required for the temporary water supply
The normal income of the municipality from the existing sources of income is about Rs 11000 while the recurring expenditure excluding provision for all original public works is about the same - Even supposing that the resources may be slightly improved by revising the House & Sharbafa taxes in the town, the extra income may just suffice to provide some minor original works and for the payment of the interest on their share of the loan - The Dy Commr has stated that the managing Committee has been asked to take effective steps to improve the resources of the Mcty to the extent of Rs 10000 But no assurance has yet been given to what extent the resources of the Mcty can be actually improved - Submitted with reference to the members note dated 14th Oct 1916 on page 3 of these Notes

Scheme for the supply of water to Chitaldrug Town.

OPINION OF THE COUNCIL.

Loan for the additional one lakh may be raised as proposed, the rate of interest being settled in consultation with the Mysore Bank. A draft prospectus may be called for.

The help to be given by Government will be similar to that already given for the first lakh.

The question of compensation for wet lands in case they have to be converted into dry may be raised after two or three years' experience in working the project has been gained.

Final Note by the Second Member of Council

Subject —

31 Scheme for the supply of water to the Chitaldrug Town

Government in their order No 4282-4/M1 93-14-3 dated 3rd December 1915 sanctioned a project for the supply of water to the Chitaldrug Town at a roughly estimated cost of one lakh of rupees They also approved of the proposal to raise a loan of a lakh of rupees to finance the scheme for which the municipality was to be responsible to the extent of ¼th and Government ¾ths

It is now found that the rough estimate requires considerable revision, on account of some additional works found necessary and the total cost comes up to nearly two lakhs of rupees The municipality propose to raise the additional loan of one lakh of rupees on the same terms as before already sanctioned for the first lakh and to make the debentures available to the people of the State both within and outside the Chitaldrug District

The matter was placed before the Council on the 30th ultimo, when it was resolved to sanction the proposal of the Municipal Council and to call for a draft prospectus, the rate of interest being settled in consultation with the Mysore Bank

The Council are also of opinion that the question of compensation for wet lands under the Katharahalu tank, in case they have to be converted into dry, may be raised after two or three years' experience in working the project has been gained

The Council's resolution may be approved

Enclosure No. 8

Submitting for sanction detailed plans & estimates amounting to Rs 1,89,888/- being the cost of the Kallarahalla project for supplying waters to the Chitaldrug town & soliciting orders in the matter of funds

Report ere 23 (Mul) Encls 8 Office of the Deputy Commissioner,
16 17 Chitaldrug District.

D 963 Dated Chitaldrug, 13th September 1916.

From

C. S Balasundaram Iyer Esquire B.A ,
Deputy Commissioner,
C H I T A L D R U G

To

L. Krishna Rao Esquire,
Offg Secretary to the Government of
His Highness the Maharaja of Mysore,
Revenue Department, Bangalore

S I R,

I have the honor to state that, as directed in Government order No.8030-2/M1 136 L.S-15-2 dated 29th April 1916, the Executive Engineer in charge of Water Supply Division got up detailed estimates and plans of the Katharahalu project for supplying water to the town of Chitaldrug and forwarded the same to this office These estimates are submitted herewith together with enclosures

2 The cost of the project which was originally estimated at one lakh of rupees now comes up to nearly 1,90,000 rupees The reasons which have contributed to the increase of Rs 90,000 are set forth in the report accompanying the estimate In connection with the estimates, I have to observe that the estimates make no provision for any work connected with the existing distribution system The mains laid down in the town about 20 years back will, in all probability, require attention here and there and additional lines will have to be laid to serve the extensions that are in contemplation and other improvements effected in the system I think it is necessary to provide some amount, say about Rs 10,000, for these items of work With this addition, the total cost of the project as a whole may therefore be roughly estimated at two lakhs of rupees

3. The detailed estimates were discussed at a special meeting of the Municipal Council convened on 2nd September 1916 and

the Municipal Council being alive to the imperative necessity of having a satisfactory system of water supply to the town has resolved that the revised estimates, as also the additional cost of repairing and improving the distribution system as stated in para 2, be sanctioned (vide copy of the resolution enclosed) An adequate supply of water is of such primary importance and necessity that the Municipal Council has no option but to adopt the above course even though the cost of the schere is almost double what was estimated a year ago It is prepared to bear its share of the capital cost viz Rs 50,000 being one fourth of the entire outlay, notwithstanding any amount of pecuniary inconvenience that may be caused to the townspeople by heavy taxation The Council has further asked the Managing Committee to take prompt and effective steps to improve the resources of the Municipality to the extent of Rs 10,000 (in addition to the present income) to meet the maintenance charges of the water works and also to provide for payment of interest on its share of the initial cost and sinking fund.

4.As ordered by Government, steps were taken to raise the loan of one lakh of rupees which has been fully subscribed already and out of the actual collections, a sum of Rs 69,000 has been deposited in the Bank of Mysore The rest of the amount will be called as soon as such a step is necessary

In regard to the additional sum of one lakh necessary for the project, the Municipality is prepared to accept responsibility for a fourth of that sum and requests that Government may be pleased to grant the balance just as has been done in regard to the one lakh of rupees already raised

5. If Government directs that the further amount of one lakh of rupees should be raised as a loan by the issue of debentures in the same manner as the one lakh already raised, needful steps will be taken in the matter but the debentures may be thrown open to the public of the State as a whole, since it cannot be locally raised in view of the fact that the people of the District have already sufficiently subscribed for the loan of one lakh of rupees and that

a railway loan is also being raised. In order, however, to give the people of the town and District the first chance of subscribing for the loan, it may be ordered that applications from people in the District offered within 15 days of the publication of the prospectus should have preference over outside applications The necessary conditions may be inserted in the prospectus.

If, however, Government have other views of financing the project, I request that the Municipal share of extra expenditure (25,000 rupees) may also be raised by the Government and lent to the Municipality at a reasonable rate of interest.

6 In these circumstances, I solicit that Government may be pleased to pass favorable orders at an early date.

On receipt of orders on this reference, a draft prospectus will be submitted if necessary, for raising the loan.

I have the honor to be,

S I R,

Your most obedient servant,

C Balasundaram

Deputy Commissioner,

Chitaldrug District

S.V.

Meeting No 4 of 1916-17

Extract from the proceedings of the special meeting of the Chitaldrug town Municipal Council held on Saturday the 2nd September 1916.

Present:- C.S Balasundaram Iyer Esquire B.A., President

X X X X X

X X X X

II. Read the revised estimate amounting to about Rs 1,90,000 for the proposed Katharahalu water supply project to Chitaldrug town

Resolution - The revised project may be approved and steps taken to raise the required additional capital on the same terms as the one lakh already raised viz the Municipality to be responsible for ¼th of the amount and the Government for ¾ths The Municipality will raise a loan in and outside the District as before A suitable provision should be made for necessary improvements in the existing distribution system

Steps will be taken to revise taxation and impose such additional taxes as may be necessary to meet the maintenance and sinking fund charges

The Managing Committee should take up the question of revision of taxes and suggest suitable measures within the next three months.

Dated Chitaldrug, 29th December 1916.

From

C. S. Balasundaram Iyer Esquire B.A.,
Deputy Commissioner,
C H I T A L D R U G.

To

B. Ramaswamiah Esquire B.A.,B.L.,
Offg Secretary to the Government of
His Highness the Maharaja of Mysore,
Revenue Department, Bangalore

S I R,

With reference to your letter No 2926/Ml 100-16-4 dated 13th November 1916 calling for further information in connection with the project for supplying water to the Chitaldrug town from the Katharahalu tank, I have the honor to state as follows:-

The tank commands an irrigable area of 769 acres and at present an extent of 428 acres and 23 guntas yielding a revenue of Rs 1241-14-0 is under occupation and is irrigated from the tank. The average market value of the wet lands below the tank is stated to be Rs 56 and 45 per acre in two villages viz Katharahalu and Rimmaghatta and it is understood that the same will diminish to Rs 18 and 38 rupees respectively in case wet cultivation is prohibited. Adopting the difference between the two rates to be the compensation payable to the land owners for the loss resulting from the conversion of wet lands into dry, the amount would come to Rs 5513 for 109 and 210 acres under occupation in the two villages referred to above. The cases of the owners of the remaining extent of land measuring about 110 acres below the tank need no consideration in as much as these lands are only paying nirsardi or water rate The valuation is only rough and is based on transactions available in the Registration records. If acquisition is decided upon the actual compensation may amount to somewhat more, the total reaching perhaps up to Rs 10,000. A statement received from the

67

Amildar of the Chitaldrug Taluk furnishing information in this connection is enclosed.

2. Personally, I am of opinion that no lands need be thrown out of wet cultivation for utilising only 20 units of water per year for the town supply out of 748 units which is the capacity the Katharahalu tank; the more so as it is proposed to have an infiltration gallery and tap only percolation water, I do not think therefore any large compensation would be needed and more especially any lump sum compensation is required to be provided now in the estimate for the project under advertence In years bad rainfall however, it may be necessary to sanction remission wet assessment, as in such years the tank water may not be sufficient both for town supply and irrigation purposes (vide the reasons set forth in the enclosed copy of my letter dated 16th March 1916 to the address of the Sanitary Engineer, Water Supply Division)

I have the honor to be,

S I R,

Your most obedient servant,

B Balasundaram
